GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

A. Name of person diverting water Cecil M. Johnson
Address Ranch of The Rim Rocks, Richardson Springs Telephone: 342-0314

B. Name of body of water at point of diversion Maple Creek
Tributary to Mud Creek - Sacramento River

C. Place of diversion 1/4 1/4 1/4 Section 30, Township 23N, Range 2E, MID. B&M, Butte
County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works No Name (Designated as Pond A on enclosed Map)

E. Capacity of diversion works 4" Pipe 400 gpm cubic feet per second
gallons per minute
Capacity of storage reservoir 2.53 gallons
acre-foot

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1977													

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Only a minimal amount of water was used in 1977 for stock watering.

It is our intent to pull water by pump and gravity in future years.

Maximum annual water use in recent years for irrigation gallons

At present, water is only accumulated by spring flow. gallons

Minimum annual water use in recent years acre-foot

Type of diversion facility: gravity X, pump _____

Method of measurement: weir _____, flume _____, electric power meter _____, water meter _____, estimate X

F. Purpose of use (what water is being used for) Cattle water and pasture irrigation

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
See attached map.

H. Year of first use as nearly as known 1868

I. Name of person filing statement Cecil M. Johnson
Position Owner Organization Ranch of The Rim Rocks
Address Richardson Springs, California 95973 Telephone: 416 342-0314

I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.
